

WORKING WITH DATASET

Project Name	Visualizing and Predicting Heart Diseases with an Interactive Dash Board
Team ID	PNT2022TMID45815

Team Leader : Latha Nandhini P

Team member : Sneha A

Team member : Nanthini M

Team member : Selvamani S

Loading The Dataset:

Before we can build a view and analyze the data, we must first connect the data to IBM Cognos. Cognos supports connecting to a wide variety of data, stored in a variety of places.

The data might be stored on your computer in a spreadsheet or a text file, or in a big data, relational, or cube (multidimensional) database on a server in your enterprise.

In our case, we will be using a spreadsheet or text file for making our analysis. Load data from **Heart_Disease_Prediction.csv** file which consist of 14 Columns

Hello. Welcome to Cognos Analytics with Watson.

You can get started right away by taking a look at our introduction video, product tour and Getting Started tab.

Watch video Take a product tour

Quick launch

Upload data

Upload or drag and drop spreadsheets, csv files, and other data sources.

Prepare data

Use data modules to clean and connect data from multiple resources.

Exploration

Quickly find unbiased answers by identifying trends in your data with data exploration.

Present data

Create sophisticated, multi-page, multi-query dashboards, reports, or stories.
